

# Reseal Your Roof in 15 Minutes (Before the Leak Starts)

*Roof leaks are the number-one totaler of fifth wheels. And ninety percent of them start at one of three spots.*

Spot one — every vent fan, around the flange. Spot two — every antenna, every solar bracket, every accessory you screwed into the roof. Spot three — the front cap seam, where the roof meets the front wall.

Self-leveling Dicor on flat roof, non-self-leveling on vertical seams. Don't mix them up. Bead it on, smooth with a gloved finger, walk away. It cures overnight.

Twenty-bucks-a-tube. Five tubes does the whole roof. That's a hundred dollars. The repair shop charges three grand for the same thing.

## THE BOTTOM LINE

**Every spring. Every fall. Set a calendar reminder. Follow for the rest of the Fix-It Fridays — there's twelve more.**
